

FROM CONCEPT TO CONNECTION

Welcome to JSM Group. We are an international leading specialist infrastructure engineering company that designs and installs the complex power networks, digital infrastructure and specialist systems a future focused worldwide marketplace needs.

From High-Power grid connections to Critical Utilities. Data Centres to Renewable Energy, our integrated end-to-end solution teams manage the full scope to help advise and deliver complex infrastructure projects at speed, on time and work with clients to navigate legislation with reduced, technical and commercial risks.

POWER

From Ideas to Energy

As demand for power grows across the world, the infrastructure behind it has become the critical connection. From concept to detailed design, civil engineering, substation construction, HV cabling and final connection, JSM Group's in-house team of power experts deliver more than an independent connection.

DIGITAL INFRASTRUCTURE

From Demand to Data

Building and maintaining the digital backbone for the worlds expanding AI data centres, telecoms and modern industries has never been so critical. From complex design, through to civil and data engineering of ultra-fast hollow core fibre and optical interconnectors, our solutions teams offer near unparalleled coverage and expertise.

ADVISORY

From Insight to Infrastructure

High-risk, high-cost, high-complexity – all very real pressures that come with digital infrastructure and HV power solutions. Which is why JSM Advisory sits at the front end of your project - working with developers, city planners, business owners, and utility companies to de-risk strategy, validate feasibility and build confidence before infrastructure construction starts.

ONE TEAM. A WORLD OF ADVANTAGE.

Tier-1 clients work with JSM Group for more than one reason. But they all add up to a major business advantage.

- **Dual expertise** in civil and utility infrastructure engineering
- **Proven delivery** in complex, high-risk projects
- **Proprietary engineering IP** with award-winning methods
- **Strong reputation** with regulated utilities and infrastructure clients
- **Agile, integrated specialism** rather than scaled, siloed generalism

FROM MAJOR POWER DELIVERY TO COMPLEX INFRASTRUCTURE

When it comes to expertise, we prefer to let our record do the talking. Here are just two of the projects we tackled recently.

Our Portfolio is your gateway to understanding how we deliver industry-leading infrastructure solutions across the UK, Europe and beyond. This page features a comprehensive collection of our project profiles, showcasing successful projects across data centres, environmental challenges, power, digital infrastructure and much more.
